To run both projects locally, I need the required environment variables and database connection details.

For BHOS Project

Please share:

- DATABASE_URL (PostgreSQL connection string)
- VITE_CLERK_PUBLISHABLE_KEY
- Any other required environment variables (if applicable)

Run Commands:

Terminal A (API):

```
cd /mnt/d/Project/BHOS
export PORT=3001
export NODE_ENV=development
export DATABASE_URL='postgresql://USER:PASSWORD@HOST:5432/DBNAME'
pnpm --filter @workspace/api-server run build
pnpm --filter @workspace/api-server run start
```

Terminal B (Web):

```
cd /mnt/d/Project/BHOS
export PORT=5173
export BASE_PATH=/
export VITE_CLERK_PUBLISHABLE_KEY='pk_test_xxx'
pnpm --filter @workspace/bhos-web run dev
```

For Mobile Money App

Please share:

- DATABASE_URL
- SESSION_SECRET
- Any additional required environment variables

Run Commands:

```
cd "D:\Project\money mobile"
$env:DATABASE_URL="postgres://USER:PASSWORD@HOST:5432/DBNAME"
$env:SESSION_SECRET="dev-secret-123"
$env:NODE_ENV="development"
$env:PORT="5000"
npx tsx server/index.ts
```

Kindly provide the above details so I can set up and run the projects locally.
